

Product Name :
Potentiometric Error Detector

Product Code :
CSL005

Description :

Potentiometric Error Detector

Technical Specification :

Potentiometric Error Detector Potentiometric Error Detector To study of potentiometer as error detector element Two Full 360 degree rotation servo- potentiometers with 1 degree resolution IC regulated DC excitation for both potentiometers AC excitation at 400 Hz approx. Built in demodulator circuit 3.5 digit DVM for carrying measurements IC regulated power supply for rest of the circuitry Complete with instruction manual and patch cords, 220V mains operated.
