

**Product Name :**  
Linear System Simulator

**Product Code :**  
CSL007

### Description :

Linear System Simulator

### Technical Specification :

Linear System Simulator Study of simulated linear systems Simulated blocks configurable as first, second and third order systems Disturbance adding facility at input and output Signal Sources Square wave : 20-80 Hz, 0-2 Vpp continuously variable Triangular wave : Similar to square wave both in frequency and amplitude Integrated triangle wave fixed amplitude Built in IC regulated power supply Complete with detailed instruction manual and patch cords, 220V mains operated.
