

Product Name :
Dc Motor Position Controller

Product Code :
CSL008

Description :

Dc Motor Position Controller

Technical Specification :

Dc Motor Position Controller Dc Motor Position Controller Dc Motor Position Controller Study of DC position Servo Position control of a 12 volt, 1 Amp DC geared PM motor (50/60 RPM) Calibrated dials with 1 degree resolution for reference and output position Two 360 degree Servo-potentiometers Built in step signal Built in waveform capture/display card for study dynamics 3.5 digit digital voltmeter IC regulated DC power supplies for circuitry Supporting literature for experiments with patch cords, 220V mains operated
