

Product Name :
Parallel Flow Module**Product Code :**
ELABBAT0012 LAB ENGINEERING**Description :**

Parallel Flow Module

Technical Specification :

Parallel Flow Module Technical Description The heat transfer in and around pipes can be investigated using. The heat transfer from the pipe wall to the medium is observed. A ring heater simulates the flow inside the pipe, while a rod heater reflects the conditions in the flow around a pipe. The power and surface temperature of the two electrical heaters are measured and displayed on the base unit.
