Jacketed Vessel with Stirrer & Coil**Product Code :**  
ELABBAT0019**Description :**

Jacketed Vessel with Stirrer &amp; Coil

**Technical Specification :**

Jacketed Vessel with Stirrer & Coil Technical Description Batches are heated in jacketed heat exchangers. The heat exchanger contains a stirrer for improved circulation and a further sensor to measure the batch temperature. A heater coil is also included. The transparent cover allows the process to be clearly observed. The heat exchanger is connected. service unit using quick-action hose couplings and star grip screws. The temperature sensors for measuring the feed and return temperature are on the supply connections. Connections for the additional temperature measuring point and stirrer are provided on the service unit
