Benders from a wide range of stock shapes including round, square, hexagonal, flat, and channel (all bar stock) and tubing. They come equipped with bend locating gauge for part duplication, Angle stop to determine degree of bend and locking pin to securely damp material. Radius forming possibilities from 0 to 12 inches. Torrington rollers installed in main bearing reduce friction, facilitate easy bending, and help bend large stock easily. Ratchet power assist for large stock is standard on Hand Model No. 4 and No. 5. STANDARD EQUIPMENT: Bend locating gauge- setting this gauge allows any number of parts to be duplicated. Angle stop-locating this determines degree of bend. Locking pin - adjusting this securely damps material. Centre pin - provides one radius setup plus mount for other tooling.
