

Product Name :
Speed Sensing Transducers

Product Code :
Measurement0003

Description :

Speed Sensing Transducers

Technical Specification :

12V DC motor with speed varying from 0-4000rpm & rotating lotted wheel having 8 lots,
Individual signal conditioning circuit with programmable threshold comparator.
F to V Converter with span & zero amplifier.
Speed transducers:

- i) Magnetic pickup
- ii) Photo reflective
- iii) Photo interruptive
- iv) Inductive pickup with envelop detector.
- v) Stroboscope
- vi) Hall sensor
