

Product Name :
Speed Sensing Transducers**Product Code :**
Measurement0003 LAB ENGINEERING**Description :**

Speed Sensing Transducers

Technical Specification :

12V DC motor with speed varying from 0-4000rpm & rotating slotted wheel having 8 slots,
Individual signal conditioning circuit with programmable threshold comparator.
F to V Converter with span & zero amplifier.
Speed transducers:

- i) Magnetic pickup
- ii) Photo reflective
- iii) Photo interruptive
- iv) Inductive pickup with envelop detector.
- v) Stroboscope
- vi) Hall sensor
