

Product Name :
TEMPERATURE MEASUREMENT & CONTROL
(THERMISTER)**Product Code :**
Measurment0003**Description :**

TEMPERATURE MEASUREMENT & CONTROL (THERMISTER)

Technical Specification :

Here simple demonstration setup is provided to experiment with non-linear characteristics of Thermister (NTC). Here using this setup one can evaluate non-linear characteristics of Thermister (NTC) by verifying actual measured values of temperature as well as resistance. Here as a additional study feature on/off control is also implemented.

SPECIFICATIONS

- Water Bath with heating arrangement.
- Thermister (NTC) with necessary signal conditioning & control circuit.
- Thermometer.
- Powder coated enclosure
