

Product Name :
Dissection Microscopes

Product Code :
MICROSCOPES0002

Description :

Dissection Microscopes

Technical Specification :

Useful instrument for demonstration, close study of small organisms and for dissection work, optical performance and mechanical precision of highest quality combined with the utmost stability in any environment.

Features

Stable cast iron round base

- Wide glass stage, has two springs clips. Detachable hand rests on both sides provide support for hands during dissection.
- By rack & pinion mechanism operated by knobs on the sides.
- By Plano concave reflector below stage provide sufficient illumination in daylight or under artificial light.
- 10x and 20x mounted on jointed arms allowing the whole area to be scanned.
- 10x and 20x magnification.
- All brass chrome plated parts like pipes, knobs & lens holding arm.
- Overall height 180 mm. Stage 90x65 mm.
