Product Name :
Medical Microscope with co-axial mechanical stage

Product Code :
MICROSCOPES0019

Description :

Medical Microscope with co-axial mechanical stage

Technical Specification :

When you are looking for an advanced level of microscope, there are certain features you need and some features you'd like as options. We've taken all of them into consideration, when building our medical microscope. We began with four achromatic building block objectives 5x, 10x, 45x (S1) & 100x (S2) or four achromatic coated par focal objective 4x, 10x, 40x (S1) & 100x (S2). Addition of main lens 30X eyepiece 10x gives large field of view. Rubber feet at the bottom provide positive grip. The body is aluminum cast metal for durability and finished in black enamel paint. These 20 numbered parafocal achromatic objectives in combination with the built-in 120 degree eyepiece with 10X magnification offers a combination of resolving power and contrast, you have never seen on the medical microscope. Their specifications are same as per Cat No. 110x or 110x but with built in co-axial mechanical stage for smooth operation.
