

**Product Name :**  
Hand Held Tune-Up Analyzer

**Product Code :**  
AutomobileLab0031

### Description :

Hand Held Tune-Up Analyzer

### Technical Specification :

Large display: 3-3/4 digit app. 4000 count, auto arranging meter with analog bar graph and additional setting symbol.  
Record max. and min.  
RS-232 interface to PC  
Combine trig± with duty cycle or pulse width  
DC and AC Volts: 400mV, 4V, 40V, 400V, 500V.  
Resistance: 400?, 4K?, 40K?, 400K?, 4M?, 40M?.  
Continuity buzzer  
Diode test to check alternators, relays, solenoids.  
K-type temperature probe should be included.  
Currents DC and AC Current: 40mA, 400mA, 20A
