

Product Name :
Hand Held Tune-Up Analyzer**Product Code :**
AutomobileLab0031 LAB ENGINEERING**Description :**

Hand Held Tune-Up Analyzer

Technical Specification :

Large display: 3-3/4 digit app. 4000 count, auto arranging meter with analog bar graph and additional setting symbol.

Record max. and min.

RS-232 interface to PC

Combine trig± with duty cycle or pulse width

DC and AC Volts: 400mV, 4V, 40V, 400V, 500V.

Resistance: 400?, 4K?, 40K?, 400K?, 4M?, 40M?.

Continuity buzzer

Diode test to check alternators, relays, solenoids.

K-type temperature probe should be included.

Currents DC and AC Current: 40mA, 400mA, 20A
