

Product Name :
Melting Point Test

Product Code :
HIGHWAY0007

LAB ENGINEERING
ELAB Machines, Trainers & Kits

Description :

Melting Point Test

Technical Specification :

A metallic heating block is provided with holes to receive three capillary tubes and a stem type thermometer. The body is finished in epoxy powder coating. The apparatus can measure melting point up to 300°. The block is heated with heating element and temp. is controlled by a energy regulator. A shadow less lamp is provided to illuminate the capillary and a focussable magnifier facilitates in observations. The whole unit is housed in a aluminum case casing and is provided with a control panel. Provided with indicator lamp, energy regulator, on-off switch, cord and plug. The equipment is workable on 220/230V, 50/60 AC supply. Supplied without thermometer and capillary.
