

Product Name :
Dielectric Constant Apparatus

Product Code :
EEI0027

Description :

Dielectric Constant Apparatus

Technical Specification :

- To measure dielectric constant of solids.
- The instrument consists of High Frequency R.F. Oscillator of 50Mc. of Variable Frequency with a Gating Condenser Optimum Resonance point is indicated on meter.
- The change in meter reading after placing dielectric material between parallel plates can be detected and difference can be noted for calculation.
