

**Product Name :**  
Vacuum Tissue Processor

**Product Code :**  
MEDICAL0011

## Description :

Vacuum Tissue Processor

## Technical Specification :

Simultaneous processing of up to 200 cassettes.

High quality specimen.

Fully automatic reagent management system.

Comprehensive monitoring and fail process control.

Eight programs that consist of up to 8 reagent and 2 parallel use steps.

Large color LCD display.

One touch start of pre saved programs.

Automatic / Manual /locking modes.

Auto cleaning cycle.

Low reagent alarm.

Easy, cleaning and maintenance		
Operation	Mixing vessel type	Mixing vessel type
Maximum capacity	50-80 Canisters	200 Canisters
Processing volume	1/2 to (Basket Vial)	5.3 to (Basket Vial)
Temperature (Parallel)	45-55 deg C	ambient - 99 deg C
Processing time (each step)	99 hrs, 55 mins	99 hrs, 55 mins
Number of programs	8	8
Weight	80kg	100kg
Parallel Baths		
No. of Baths	2 (Optional)	3
Volume	1/2 Liter	4 liter each
Reagent Stations		
Number	10 Stations	9 Stations
Volume	1/2 Liter	4 liter each
