

Product Name :
Thin Layer Chromatography Apparatus

Product Code :
MEDICAL0020

Description :

Thin Layer Chromatography Apparatus

Technical Specification :

To introduce the principles of absorption chromatography using the thin layer technique.

The mechanism is having movable applicator with suitable thickness arrangement between 0 to 2mm (maximum dia: 0.25mm) is further consists of the following components.

1. Spreader (applicator) made of electroplated brass.

2. Perspex base of 114x231 cm to support glass plates.

3. Plate rack aluminium, modified for use 20x20cm or 20x15cm plates.

4. Developing tank with lid.

5. Spraying template made of perspex.

6. TLC plates set of five 20x20cm, and two 20x4cm, or set of ten 20x15cm and two 20x4cm.

7. Glass syringe with rubber bulb, cap: 100ml.

8. Micro pipette.

9. Substrate for making lines made of stainless steel
10. Instruction manual
