

Product Name :
ICE FLAKING MACHINE

Product Code :
BMHCE0010

Description :

ICE FLAKING MACHINE

Technical Specification :

These self-contained units provide maximum efficiency and performance under continuous operating conditions. Choose either air- or water-cooled condenser units depending on your laboratory room conditions. Removable front cabinetry facilitates easy access for maintenance and replacement of air filters, and water pump. Included 6" legs raise the ice maker off the floor for easy cleaning or leveling on uneven floors.

Flaked-Ice Makers produce up to 395 lbs of flaked ice per day and store 140 lbs in the self-contained bin. Flaked ice quickly conforms to your container or sample tubes for greater cooling capabilities than other ice forms and is perfect for short-term packing and shipping of laboratory samples.
