

Product Name :
 MORTUARY FREEZERS

Product Code :
 BMHCE0012

Description :

MORTUARY FREEZERS

Technical Specification :

Designed to store cadaverous under cool conditions to prevent decomposition. Double walled construction outer made out of thick mild steel/brushed duty finished in strong enamel paint and inner made out of stainless steel sheet. The gap between the two is filled with glass wool for temperature insulation. Front opening covered with double walled door with magnetic gasket, lock & key and handle. Individual chambers are provided with handles on both ends travel on rollers fitted on ball bearing for smooth movement. The refrigeration unit is fitted on the rear top. Temperature -20°C to -30°C is maintained by hermetically sealed compressor unit and is controlled by an automatic electronic digital temp. Controller-computerised. Panel is provided with indicator & Controller etc. Complied with cord & plug. The unit is to work on 220V AC 50 Hz single phase.

Capacity	Temp.	Voltage Stabiliser
1. Single Body	-20°C to -30°C	30VA
2. Two Bodies	-20°C to -30°C	40VA
3. Three Bodies	-20°C to -30°C	50VA
4. Four Bodies	-20°C to -30°C	60VA
5. Six Bodies	-20°C to -30°C	80VA

Optional - Automatic Voltage Stabiliser 30VA max.
