

Product Name :
Plant Growth/ Environmental Chamber

Product Code :
BMHCE0013

Description :

Plant Growth/ Environmental Chamber

Technical Specification :

Plant Growth Chamber have been working successfully in many research, Education and agriculture industries.

Microprocessor/PC/Digital control provides precise temperature, relative humidity and illumination maintain uniform and accurate growth environment, timer, alarm, auto-runnng and auto stop function.

999 cycles Programmable controller provides automatic operation of variable temperature, humidity and illumination value.

Self-Diagnostic Function automatically checks any malfunctions and make warning signal.
Technical Design and Construction: Special fan motor to maintain uniform temperature and humidity.
Light Bank System: 200watts with 6 step programmable control from low to high, output from 10,000 to 35,000 Lux. Lamp-on-Delay System protects plants from stress by preventing sudden change of light strength.
Safety and Convenience: over temperature and current protection capability, remote alarm ability, adjustable shelving rack, water level sensor.
Humidity Control by electronic humidity sensor provides accurate control from 30% to 90% RH.
Optional Mobile Alert Control System automatically make a call to user's mobile phone when temperature change by unexpected interruption of electrical power or unauthorized change Temp Range 0°C to 70°C Option.
Low Cost PUF insulation, CTC Free are some other beautiful features of our product.
