

Product Name :
OVEN UNIVERSAL (MEMMERT TYPE)
THERMOSTATICALLY CONTROLLED

Product Code :
BMHCE0031

Description :

OVEN UNIVERSAL (MEMMERT TYPE) THERMOSTATICALLY CONTROLLED

Technical Specification :

These Oven Universal (Memmert Type) are general purpose heating equipments, a must for every laboratory. They are sturdy double walled units with outer chamber made of M.S. sheet pre-treated with primers for rust proofing painted with attractive stone enamel or powder coated with inner chamber made up of anodized aluminium or S.S. sheet. The gap between inner and outer chamber is filled with high-grade glass wool to avoid thermal losses. Beaded heating elements made of kerolite Al wire are placed in this, at bottom and sides. Inner chamber is provided with ribs for adjusting perforated shelves to convenient height. Temperature is controlled by electronic digital controller/hydraulic thermostat from 5° C above ambient to 200° C ± 1°C. Air ventilators are also provided on the side of the unit.
