

Product Name :
Cruise Control Trainer**Product Code :**
THEM0003**Description :**

Cruise Control Trainer

Technical Specification :

The Cruise Control Trainer is designed to demonstrate how the cruise control system works in a vehicle the device is designed based on the mechanical type CCS to holistically demonstrate the structure and operation of the system.

Cruise Control is used in cars to drive at a constant speed.

The device applies to theoretical teaching and maintenance training of the CSS in secondary and senior vocational skill school, normal education and training institutions.

This enables the driver to take foot off the throttle.

In long journeys on highways, it becomes tiresome to keep on puching the pedal.

FEATURES:-

Variable speed control

Variable load control

OEM components

SPECIFICATION:-

The cruise control takes its speed signal from a rotating driveshaft, speedometer cable, wheel speed sensor from the engine's RPM, or from internal speed pulses produced electronically by the vehicle.

The vehicle will maintain the desired speed by pulling the throttle cable with a solenoid, a vacuum driven servomechanism, or by using the electronic systems built into the vehicle (fully electronic) if it uses a 'drive-by-wire' system.

External Power Supply: AC 220V 10% 50Hz

Operating Voltage: 12V DC

On/off button
Set/accel peddle
Resume button
Brake peddle
Clutch peddle
