

Product Name :
Temperature Measurement**Product Code :**
PCE0002**Description :**

Temperature Measurement

Technical Specification :

Temperature Measurement. There are Different types of temperature sensors for characteristics and time constants. The setup is designed to study:

- Seebeck effect.
- Temperature indicator and its calibration.
- Temperature transmitter and its calibration.
- Compensating cable, thermocouple connector.

Technical Specification

- Temperature sensors such as mercury in glass thermometer, bimetal dial thermometer thermistor and thermocouple.
- Temperature indicator
- Two wire temperature transmitter with power supply
- Thermocouple connector and compensating cable
- Bare elements of Thermistor, Thermocouple to visualize actual elements.
