

Product Name :
Cross Cut Saw**Product Code :**
MELC0014**Description :**

Cross Cut Saw

Technical Specification :

Cross Cut Saw

The handle can also be fitted to the top of the blade to help you push the blade if using alone.

The teeth are a Great American style tooth which uses gullets to enable the waste wood to be cleared whilst cutting.

The 3 foot One Man Cross Cut Saw has a clear finished beech handle and comes complete with an auxiliary handle which can be attached to the front of the blade so you can get some additional assistance with cutting if necessary.

Features:-

Length of the saw 21 to 27 ":

Teeth make right angle toward the direction of the wood grain.

Teeth Range:-

8 to 12".
