Saw Teeth Setting Pliers**Product Code :**
MELC0055**Description :**

Saw Teeth Setting Pliers

Technical Specification :

Saw Teeth Setting Pliers

Correctly set teeth on a saw blade is essential for the smooth operation of the saw.

The pin is 1.5 mm in diameter and will work with blades that have a 1.5 mm pitch or greater.

These saw setting pliers are fully adjustable giving the ability to set teeth from 0.7 mm to 2 mm away from the centre of the blade. Manufactured from aluminium, these pliers have a hardened high speed steel pin that push the teeth out to the required distance.

Features:-

Manufactured from aluminium.

Works with both Japanese saws and western style saws.

Hardened high speed steel pin pushes the teeth out to the required distance.
