

Product Name :
Human Skeleton Full Size Flexible with Muscle 170cm

Product Code :
ELAB-HUMC0012

Description :

Human Skeleton Full Size Flexible with Muscle 170cm

Technical Specification :

Human Skeleton Full Size Flexible with Muscle 170cm

Description:-

All movable parts are joined by connectors and utilized in such a way to allow movement around the joint.

This full-size human skeleton has a flexible spine that can bend to mimic natural human movement.

Comes pelvic mounted on a roller base and supplied with a corresponding diagram.

Hands and feet are wire mounted to demonstrate their natural position.

The skull features a movable jaw, removable skullcap, suture lines and a full dentition.

Bones are cast individually from naturally colored plastic with anatomical detail.

Both the arms and legs are removable for further study.
