

Product Name :
Bacteriological Incubator

Product Code :
ELB-BOD0001

Description :

Bacteriological Incubator

Technical Specification :

Material: Stainless Steel
Temperature Range: 5-60 deg. C
Frequency: 50 Hz
Voltage: 230V
Insulation: Glass Wool (65mm)
Accuracy: +/-0.5 deg. C
Heating Element: U type Nichrome wire

Triple walled construction
Inner made of SS 316 mirror polished
Outer made of SS 304 dull finish
Heaters are placed at the right & left side of the inner chamber
PID Controller with auto tuning facility with double display to view set & current temp.
Silicon rubber gasket fitted on door to prevent lost of heat
Control Switch & pilot lamp are fitted on front panel supplied with SS Rod Type Jali
