

Product Name :
Metallurgical Samples

Product Code :
ELAB-MTE0011

Description :

Metallurgical Samples

Technical Specification :

Bakelite Mounted Ready Specimen for microscopic Observation.

A set consists of 23 Standard samples which covers the entire range.

Complete information including chemical composition, mechanical treatment, details of heat treatment, type of Etchant with description of Microstructure along with their colored photographs are provided in a booklet.

FEATURES:

These sets are supplied in a wooden storing box with silica gel.

Type of Etchant with description of Microstructure along with their colored photographs are provided in a booklet.

LIST OF METALLIC MICROSTRUCTURE

Dead Mild Steel

Mottled cast Iron

Low Carbon steel

Ductile cast Iron

Medium Carbon steel (Annealing)

Cartridge Brass

Medium Carbon steel (Normalizing)

Hardened steel

Anodized Aluminum

Tempered steel

Fusion Welded Mild Steel

Carburized steel

Friction Welded Steel
Muntz Metal
Decarburized High Carbon steel
Tin Bronze
Inclusion in steel
Electroplated Component
Tool steel
Powder Metallurgy Component
Gray cast Iron
Deformed Mild Steel
White cast Iron
