

**Product Name :**  
Digital Corollis Component of Acceleration Apparatus**Product Code :**  
Dynamics0008**Description :**

Digital Corollis Component of Acceleration Apparatus

**Technical Specification :**

When a mass moves relative to the reference system within a rotating reference system, this movement is deflected.

This deflection is caused by the Coriolis force, an apparent or inertial force.

The Coriolis force plays a crucial role in meteorology and physical oceanography, since it influences the course of air and water currents due to the Earth's rotation.

In engineering, the Coriolis force occurs when a rotational motion interferes with a further movement of the same object.

This can occur for example in cranes, gearboxes or robots.

The experimental unit is designed to clearly demonstrate the effect of the Coriolis force in a rotating reference system.

A transparent water tank with submersible pump is placed on a rotatable arm and then rotated.

Within the rotating reference system, the pump produces a water jet in a radial direction.

Depending on the flow rate of the pump or the water velocity, as well as speed and direction of rotation, the water jet is visibly deflected due to the Coriolis force.

The degree of deflection can be determined by means of a scale on the water tank.

The speed is continuously adjustable, electronically controlled and digitally displayed.

**FEATURES:**

Inertial or apparent force

Interference of a rotational movement on a translational movement

Visualization of the Coriolis force effect

---

Visualization of the Coriolis force effect

Rotating reference system

Water jet as moving mass

**SPECIFICATION:**

Rotating reference frame consisting of transparent water tank with submersible pump on a rotating arm

Scale to read the deflection of the water jet

Closed water circuit

Speed sensor with digital display

Rotating arm Continuously adjustable speed: 0...60min<sup>-1</sup>

Submersible pump :

Flow rate: 10L/min

Required for operation :

230V, 50Hz, 1 phase

230V, 60Hz, 1 phase; 120V, 60Hz, 1 phase
