

Product Name :
HSS Slitting Saw

Product Code :
ELABHTOOLSUK510005

Description :

HSS Slitting Saw

Technical Specification :

The saw blade matrix is made of HSS with heat treatment, and the hardness is up to 40?45HRC. The cutter is made with middle teeth, and is welded as a whole to ensure its solidness.

Wide Application: Suitable for cutting wood material, PVC pipe, glass fiber board, plywood, three-ply board, slitting and slotting steel, copper, metal, plastic, wood, etc.

Superior performance: Adopt from the automatic sharpening device to ensure high edge sharpness, will not damage easily, don't burn the wood and will not burr.

Rational Design: The slitting saw cut quickly, is easy to operate. Non-Stick coating reduces friction which protects against rust and resin build-up, resulting in maximum performance.

Circular Saw Blade: The cutter is sharp with a high speed, and will not collapse. The hole in the saw blade is for cooling.

Arbour Diameter ? 22, 27, 40mm.
