Compressive Test Specimens**Product Code :**
ELABHTOOLSUK520001 LAB ENGINEERING**Description :**

Compressive Test Specimens

Technical Specification :

This test is used to determine the compressive strength of a concrete cube, which has usually been made from fresh concrete cast in a standard test mould.

The value of compressive strength can then be used to assess whether the batch that the concrete cube represents meets the required compressive strength.

Diameter: 50mm, height: 25mm.

Material: Cast Iron, Aluminium, Copper, Plastic Wood.
