

**Product Name :**  
Internal Combustion Engine

**Product Code :**  
ELAB-ENG-01-0001

**Description :**

Internal Combustion Engine

**Technical Specification :**

The presence of Internal Combustion Engines can be noticed in powerful industrial machinery, automobiles like cars and easy to relocate equipment.  
These are also used to operate rockets.  
The combustion chamber of these engines acts as a suitable enclosed area for burning fuel.  
The movement of these engines depends on the expansion or circulation of heated gases.  
The hot gases are instrumental in driving rotor or piston of these combustion engines.
