

**Product Name :**  
Transmission Line Trainer**Product Code :**  
ELAB-ENG-03-0002**Description :**

Transmission Line Trainer

**Technical Specification :**

In telecommunications transmission lines are used to convey signals from one point to another. The line properties become very important especially in multi-channel systems. The TLT is a unique design for experimenting with various properties of a transmission line. The unit provides the basic concepts of a coaxial line and includes all devices and accessories required to conduct the experiments.
