

Product Name :
Magnetic Compass Needle**Product Code :**
ELAB-TENDR-002-0015 LAB ENGINEERING**Description :**

Magnetic Compass Needle

Technical Specification :

For studying magnetic phenomena such as operation of a compass, testing of magnetic poles, finding the direction of electric current etc.

Consists of a magnetised steel needle about 150mm long with brass bearing pivoted on a non-magnetic metal stand.

North pole is marked in red.

The needle when not in use is reversed and kept in main rod for safety.

On stand
