

Product Name :
Pendulum Bobs**Product Code :**
ELAB-TENDR-002-0050 LAB ENGINEERING**Description :**

Pendulum Bobs

Technical Specification :

The pendulum bob provides one of the necessary tools for studying the physics of pendulum motion (tension force, gravity force, centripetal force, potential energy, kinetic energy, etc.).

When used with a full pendulum set up, it provides a visually and kinesthetically effective method by which to study pendulum physics.

Spherical brass object with hook, diameter 25mm.
